PROFESSIONAL SUMMARY

Digital experience professional with 5 years of experience leading digital content initiatives, CMS operations, and global publishing workflows across cross-functional teams. Skilled in Adobe Experience Manager, DAM governance, Agile project delivery, QA automation, and stakeholder alignment. Built GenAI-assisted QA and content governance workflows using Playwright, Python, Claude Code, MCP concepts, and agentic AI design to detect content issues, automate tagging, route approvals, and improve publishing reliability. Passionate about growing in AI-augmented content operations, agentic workflows, and scalable governance systems that combine automation with human oversight.

WORK EXPERIENCE

Apple via WPP Production | Marketing Ops and AI Content Manager Nov 2024 - May 2026

- Led end-to-end content authoring, publishing, and localization operations in Adobe Experience Manager across 60+ global markets, delivering 99% publishing accuracy while ensuring adherence to Apple MarCom brand and legal standards.
- Improved metadata taxonomy and asset governance frameworks to enhance digital asset discoverability, streamline cross-regional workflows, and support scalable content delivery for Channel Relay initiatives.
- Developed GenAI-assisted QA automation using Playwright and Python to detect and correct HTML/content errors, reducing manual checks by 70% and improving publishing reliability.
- Designed and implemented an agentic AI-powered content tagging and workflow automation system by building custom MCP and integrating ticketing data with AEM DAM using Claude Code, reducing manual effort by 60-70% and accelerating time-to-publish by 30%.
- Supported UAT by validating feature updates in AEM against requirements and coordinating fixes with the development team to keep releases on schedule.
- Facilitated stakeholder working sessions to define scope, dependencies, and acceptance criteria for workflow improvements.

Accenture | Content Development Associate Oct 2021 - Sep 2022

- Executed delivery of 500+ marketing assets by coordinating content plans mapped to Lavazza's global customer journeys, supporting campaign KPIs and improving organic reach across markets.
- Increased cross-team efficiency by 20% through product analysis, clear requirements, SOPs, and streamlined global content delivery workflows.
- Managed sprint execution within Agile frameworks, tracking stories and deliverables in JIRA and contributing to a 15% improvement in sprint velocity through better planning and follow-through.
- Optimized multilingual digital experiences in AEM and SAP Hybris, validating performance through Adobe Analytics to achieve 20% CTR uplift and 10% conversion growth.

DroneStark Technologies | Digital Marketing Analyst Jul 2019 - Sep 2021

- Enhanced lead conversions by 25% through integrating Google Analytics with Squarespace CMS and optimizing landing page UX for targeted audiences.
- Expedited data reporting by 30% by analyzing marketing data in Excel and Looker, delivering insights that informed strategic content and SEO adjustments.
- Advanced organic growth by boosting website traffic 40% in six months through SEO best practices, keyword strategies, and digital content restructuring.

PROJECTS

AEM Agentic AI Publishing System - Apple

- Built a production AI agent that accepts plain-English requests via Slack and autonomously completes full content publishing workflows - from content edits through quality checks, live publishing, and preview generation - across 50+ global markets with no manual system access
- Created a custom AI tool integration layer connecting 17 capabilities across content management, bug tracking, document collaboration, and file storage - allowing the AI agent to work across all systems in a single conversation
- Implemented a multi-agent system where independent AI agents handle quality assurance, publishing approvals, and preview generation - with role-based permissions and automatic rollback if any verification step fails
- Solved enterprise Single Sign-On (SSO) authentication for all internal tools using browser automation - the AI agent securely logs into corporate systems automatically, with session renewal when credentials expire

Global New Product Introduction for Apple

- Led end-to-end content execution for iPhone, AirPods, Apple Watch, iPad, Mac, and MacBook Neo launches across 60+ markets using Adobe Experience Manager, ensuring consistency across regional deployments and alignment with global B2B partner requirements.
- Managed 1,000+ digital assets, product configurations, metadata tags, and page components in AEM DAM under Apple's pre-release protocols.
- Analyzed AEM asset status reports with Excel to validate metadata and Stage vs Prod asset counts and reduce publishing errors by 20%.

NovaStudios Command Centre - AI Content Governance Platform - Personal Project

- Built a cross-layer content intelligence platform in Python and Streamlit that ingests content data via public APIs and runs automated signal detection across SEO, editorial, and campaign alignment layers.
- Designed a custom signal rules engine that detects 11 content quality issues, scores campaign risk, and escalates HIGH and MEDIUM signals to a human approval queue, replacing manual QA checklists.
- Integrated Anthropic Claude to generate plain-English content readiness briefs for flagged issues, with Approve/Reject decisions logged to an immutable audit trail for governance and compliance.

EDUCATION

Northeastern University Sep 2022 - Mar 2024
Masters, *Analytics*

University of Mumbai Jul 2015 - Apr 2018
Bachelor of Commerce, *Commerce*

CERTIFICATIONS & ACHIEVEMENTS

- Google Analytics - Google
- Certified ScrumMaster - Scrum Alliance
